

BRIDGE ROAD SCHOOL

FOCUS OF THE WEEK

LEARNING

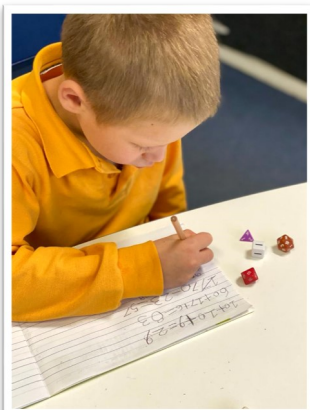

We are constantly learning new things, or referring to our existing knowledge. Even when we are not learning, we are applying skills or knowledge about something we have learnt in the past.

This week our focus is on ‘Learning’ and teaching the students at Bridge Road School the importance of concentrating in class, staying on task, finishing their work, listening in class and being committed to their work.

Learning is the key to achieving a student’s full potential and at Bridge Road we encourage students to participate in class, and collaborate with each other. When students are invited to actively participate in their learning environment they take more responsibility for their work and when they have an opportunity to make decisions about what they learn and how they use that knowledge, students see value in what they are learning and are more committed to their goals.

Stay on task

Participate

Learning is fun

Concentrate
